HE MANUSCRISSION OF REVEL ATTOM OF 175 CONTENTS TO OR RECEIPT DY AN EASTHONIZED PERSON IN PROMINITED BY LAW THE REPRODUCTION OF THIS FORD IS PROMISTED.

THIS IS UNEVALUATED INFORMATION

50X1-HUM

Minister of Smelting and Ore Mining Fritz Selbmann stated that Czechoslovakia had failed to deliver the much-needed construction plans and specifications for two List German projects. He requested that Huttenrauch ask the Commercial Attache of the DDN diplomatic mission in Prague to inquire into the matter.

- 2. In both cases, the Czcchs committed themselves to the deliveries by decisions reached in the Committee for Technical-Scientific Cooperation with the CSR.
- 3. The first instance concerned a decision taken a long time previously to give the DDE construction specifications for a continuing semi-finished mill (kontinuierliche Halbzeugstrasse) for Stahl-und anlawerk Brandenburg The failure of the Czechs to deliver, Selbmenn stated, was remarkable all the more because in 1951 a similar mill was delivered from the Lenin Forks in Pilsen to Poland, and because, therefore, the plans must exist. If the specifications are not delivered then, it will be impossible to plan the necessary pipe network, power supply, crane equipment, et and since the "DB now has only a schematic sketch and a description not exact enough to draw up final plans.
- 4. The second case was based on a decision made after the visit of (fnu) Kempany of the Riesa steel and rolling mill to the CST. Thile there, he visited a pipe manufacturing plant (Rohrwerksanlage). Kempany requested the plans for the installation; the Czechs, in turn, asked for copying paper (Lichtpauspapier) in order to transcribe the speci "ications. The paper was delivered by the DDR, but in the several weeks since then nothing has been heard from the CSR.
- 5. Selbmann requested the delivery of the plans as soon as possible so that there would be no further delay in the compiling of the 1953 investment plan.
